REPORT ON

ELOCUTION COMPETITION

ELOCUTION COMPETITION

EEE Department in association with NSS 180 organized an elocution competition, focusing on important topics such as democracy, electoral participation of youth, and the significance of voting. Several students actively participated, delivering insightful speeches that highlighted the role of young voters in shaping a democratic society. The competition encouraged thought-provoking discussions, fostering awareness about civic responsibilities and the impact of informed voting decisions. Through this initiative, students gained a deeper understanding of democratic principles, empowering them to contribute meaningfully to the electoral process.Coordinator: Thansi S, Assistant Professor

Date of Event : 07/01/2025
Venue: MBCETClassroom
Participants: Students of the EEE Department

OBJECTIVES OF THE PROGRAMME

- To encourage students to express their views on the importance of democracy and the power of voting.

-
- To raise awareness about the role of youth in shaping the future through active electoral participation.

-
- To foster public speaking skills, critical thinking, and civic responsibility among students.

-
- To align engineering education with the values of active citizenship and ethical leadership.

- .

OUTCOMES OF THE PROGRAMME

Students gained awareness of democratic values and electoral processes.

Improved public speaking and articulation skills among participants.

Increased student interest in civic engagement and social responsibility.

Encouraged the integration of technical education with socially conscious behavior.

PO JUSTIFICATIONS

PO6   The Engineer and Society   Encourages students to understand their role as responsible citizens in a democratic society, promoting active civic engagement.

PO8   Ethics Instills ethical awareness about voting rights, duties, and integrity in a democratic system.

PO9   Individual and Team Work   Students work collaboratively during the event (e.g., as speakers, volunteers, coordinators), fostering mutual respect and teamwork.

PO10 Communication   Develops public speaking, articulation, and argumentation skills, which are essential for professional communication.

PO12 Life-long Learning Promotes awareness of civic duties and encourages students to stay informed and actively participate in democratic processes throughout their lives.

POSTER

CONCLUSION

The Elocution Competition on Democracy and Voting Awareness successfully promoted civic awareness, communication skills, and ethical values among EEE students. It reinforced the idea that engineers, while technical professionals, also have vital roles as informed, active citizens
